

Your entire PV monitoring, manufacturer-independent, in a single overview.

Solytic is the hardware-independent monitoring platform for your operation.

### Independent

Stay flexible with your choice of manufacturers thanks to our wide compatibility.

### Efficient

Centralize your entire portfolio in one software and save valuable resources.

### Standardized

Unified processes and data for all your installations.

1

#### Start Free Trial

Try our software free for one month.

[>> Try now](#)

2

#### Get a quote

Based on your site list, we will prepare an individual offer for you.

3

#### Integrate portfolio

You can onboard your systems yourself within a very short time. We are happy to support you in this.
