

Let the professionals handle your PV monitoring

We take care of the complete PV monitoring for you. Save time and focus on your core business while your PV sites are managed by experts.

Save time

You gain more time for your core business.

Security

We will inform you immediately if action is required.

System maintenance

We set up your system in the portal and keep it up to date.

Your portfolio is in safe hands with us

Onboarding and maintenance

Onboarding of new sites

New PV sites are integrated and configured properly by us.

Alarm system configuration

We configure the alarm system of your PV sites so that you are reliably informed of disturbances and irrelevant or false alarms are avoided.

Maintenance and care

We regularly check the data and configurations within your account to ensure they are always up to date.

Monitoring

Active notification

In case of relevant disturbances, we actively contact you, provide you with guidance, and present solution proposals.

Regular reporting

We regularly provide you with meaningful reports on your sites. Additionally, you can conduct deeper analyses with our monitoring experts.

...and much more

Feel free to contact us for individual services.
